PROFILE

Software Engineer with robust professional experience in modern web development, specializing in advanced WordPress architecture and Artificial Intelligence. Strong background in custom CMS frameworks—including WooCommerce, Elementor, and Advanced Custom Fields—alongside building intelligent, data-driven digital solutions.

EDUCATION

B.Sc. Software Engineering

Dec 2022 – Jun 2026

University of Sargodha (UOS) | Sargodha, Pakistan

CGPA: 3.32 / 4.00 (82.16%)

Final Year Project: Auctify – Online Auction Web Application Live Demo: https://auctify-mu.vercel.app/

- **Developed** a full-stack e-commerce auction platform using modern web technologies to facilitate real-time bidding, secure user authentication, and seamless transaction management.
- **Engineered** scalable database schemas and integrated robust APIs to handle concurrent auction sessions, automated bidding increments, and live inventory updates.
- **Optimized and deployed** the responsive front-end architecture via Vercel, benchmarking rendering performance and load times to ensure high availability and a seamless cross-platform user experience.

Generative AI: Introduction and Applications

IBM | Score: 80.35%

Programming Foundations with JavaScript, HTML and CSS

Duke University | Score: 84.17%

WORK EXPERIENCE

WordPress Developer

Jan 2026 – Present

WMC - MEDIA | Remote, Netherlands
